

Beginning Tuesday, April 16th, the intersection of STH 28/67/175 and CTH TW north of Theresa will become a 4-WAY STOP.

The Wisconsin Department of Transportation has logged multiple crashes at this intersection and has determined that the ultimate improvement should be the construction of a roundabout. Until that construction, currently scheduled for 2022, a 4-WAY STOP will be used as an interim measure to improve safety.

New overhead STOP signs with flashing red beacons shall be installed on the north and south legs of this intersection. The east and west legs currently are required to stop.

Drivers are urged to use caution when approaching this intersection.
